## TALE OF A SOVIET BIOLOGIST

By  
Triloki Nath Dhar.

This book is sensational and interestingly packed with facts that can move everyone. It should attract and impress many who want to enjoy reading through an atmosphere of fear and suspicion.

Editorial Board,  
ALPHA-BETA PUBLICATIONS LTD.  
Calcutta.

February, 1963.

## A BUNCH OF SHORT ROMANCES

By  
Triloki Nath Dhar

This book is perceptive and illuminating in its exposition and style of story-telling. Its themes are colourful and represent a wide range of social events on a true familiar background. The work should find a large segment of the general reading public.

Editorial Board,  
Alpha-Beta Publications,  
Calcutta

February, 1963

This book is fascinating. With a splendid art of story-telling the tales create a pageant of varied rhythms of life. The stories are told with utmost sincerity, subtle humour, and with an incisive insight into human responses. The book is recommended for all those who love unusual creations even from common anecdotes of life.

Dr. R. N. Bhat,

Most fascinating.....

Bertil Falk

Author & Journalist  
SWEDEN.

Valued book. Very interesting cultural book. —  
MILACHAR (Bombay)

The explanations and comments indicate what an amount of care has been devoted to bring out the inner significance of Rupa Bhawani's message .....

KASHMIR HERALD

A work of value by a devoted scholar

KOSHUR SAMACHAR  
(Delhi)

Lovely book.....

Alice Christensen Rankin,  
President, Light of Yoga Society,  
Ohio, U.S.A.

Triloki Nath Dhar hade innan han skrev boken om *Rupa Bhawani* en del skriftstalleri bakom sig. Ett knippe noveller kallade *A Bunch of Short Romances* utgjorde hans debut. 1965 kom berättelsen *Tale of a Soviet Biologist*, där han gjorde upp med radikala ungdomstids kommunism på att sätt som kan föra tanken till Arthur Koestler och andra intellektuella europeer.

Den indiska dagstidningen *The Sunday Standard* skrev den 21 januari 1979 att den amerikanska rymdstellit som upptäckt "att moln av gas och stoft sa massivt att det med tiden kan orsaka att universum upphör att expandera och och kanske falla tillbaka in i sig självt för att processen ska upprepas igen" bekräftar en hypotes som Triloki Nath Dhar lagt fram.

## CONCEPT OF "I"

by

Triloki Nath Dhar

Renee Haynes, in her Postscript to Arthur Koestler's book **THE ROOTS OF COINCIDENCE**, has pointed out that "There can be no perception without a perceiver; and contemplatives retain their selves enough to perceive as they rejoice." To know the *perceiver* is of fundamental importance to all disciplines. The author has expatiated on the subject in his earlier books **TALE OF A SOVIET BIOLOGIST** and **RUPA BHAWANI**. In the pages of this work you will surely find initiated into the mysteries of the *self* in a transparent, delightful and stimulating style which characterize Dhar's writings. The *Creativity* existing within the self and operating in the universe has been dealt with in a pioneering manner and may open up new vistas of thought. The poem **VISION OF CREATIVITY** will be found quite fascinating. The whole fabric of the work rests on scientific premises. One of the attractions of the book is that the author has chosen T. S. Eliot's poem **THE WASTE LAND** as a model for showing up some main features of the internal working of the mind.
